1. Introduction

In 2022, MONSU Peninsula (**MONSU**) engaged OGL Group to conduct their Annual Elections, after having conducted their Annual Elections for over a decade.

Glenn Donahoo was the Returning Officer for the 2022 Annual Elections and is the author of this report.

This report sets out the process by which the elections were undertaken, specifically highlighting areas that required attention by the Returning Officer and electoral participants.

An overview of the results is provided, emphasising trends and other observations.

The key issues and other areas of concern experienced in the election are discussed in detail. Finally, a set of recommendations are provided to MONSU and future Returning Officers as suggestions by which the electoral process can be improved.

2. Process

Pursuant to the Regulations, notice was given on 1 August that Annual Elections would be held from Monday 19 September to Thursday 22 September 2022 (see [Appendix 1 – Notice of Election](#)), with nominations for all positions due 5pm Friday 26 August. The Notice of the Election was disseminated to all Peninsula students by email and was also published on the MONSU Peninsula website.

Nomination forms and all other election paperwork including candidate and policy statements could only be submitted via email or the MSL Election platform at these elections.

Candidate Nominations

Nominations were opened at 9am on Wednesday 17 August and closed at 5pm on Friday 26 August.

After the closing of nominations, a detailed verification process was undertaken to ensure that candidates and their nominators and seconders were eligible to participate in the election as provided for in the Constitution and the Regulations.

The verification process resulted in all nominations being determined as being eligible.

3. Results

Once the eligibility of the nominations had been determined, the Notice of Nominations Received was posted on Friday 26 August with all positions being declared unopposed (see [Appendix 2 – Notice of Nominations Received & Declaration of Results](#)).

The notice was made available on the MONSU website and via an email sent to all candidates.

4. Issues

This section deals with specific problems which arose with the election process or logistics, as well as serious disputes or contentious rulings made by the Returning Officer. It is not intended to be an exhaustive account of each issue that became necessary for the Returning Officer to consider.

MSL Voting Platform

The MSL voting platform has a number of positive attributes that make it appropriate for use for MONSU's Annual Elections. Its use in Australian student union elections is however still quite recent and requires further improvement to ensure it can be used with no issue. In particular, the inability to run test ballots or adequately view and test the election prior to polls opening is an issue that needs to be resolved.

MSL's compatibility with MONSU's new regulations was untested this year due to the election not being contested.

5. Recommendations

There is only one recommendation, as below:

Work with MSL to improve the voting module

MSL's functionality is increasingly improving, however there are still improvements that are needed to ensure it functions as well as possible within the requirements of the Regulations.

In particular the following areas should be worked on prior to any future elections:

- Ability to adequately test the voting platform by the Returning Officer and election staff prior to the opening of polls.
- Refinement of ticket voting options, including ensuring the Returning Officer can amend the ticket order as required.
- Modification of the election counting module to comply with the requirements of the Regulations.
- Option to ensure all voting data is anonymised including to MSL. While the current system where individuals voting data is not able to be accessed by MONSU or the Returning Officer is largely acceptable, this should be improved such that the data MSL has and can provide for manual recounts does not include identifiable voter data. This is particularly important if any data breaches occur.

6. Conclusion

The election this year was very straightforward due to the absence of polling.

Thanks go to all the staff involved in running the elections, including OGL Group, MONSU and University staff who assisted in various ways throughout the election, particularly Elise Redmond.

I wish all successful candidates the very best as they undertake their new responsibilities in the coming year.
